

# Lecture Notes in Computer Science: Volume Editors' Instructions

Alfred Hofmann, Ingrid Beyer, Tatjana Golea,  
Christine Günther, Frank Holzwarth, Anna Kramer, and Erika Siebert-Cole

Springer-Verlag, Computer Science Editorial,  
Tiergartenstr. 17, 69121 Heidelberg, Germany  
{alfred.hofmann,ingrid.beyer,tatjana.golea,christine.guenther,  
frank.holzwarth,anna.kramer,erika.siebert-cole,lncs}@springer.com  
<http://www.springer.com/lncs>

**Abstract.** These instructions give a description of the tasks to be performed by the Volume Editor(s) to ensure a timely and smooth publication process. The authors may use the  $\text{\LaTeX}$  file of these instructions or the  $\text{\LaTeX}$  file of the authors' instructions as a template for their own papers.

## 1 General Information and Workflow

Alfred Hofmann, the Editorial Director, is the first point of contact. He is responsible for coordinating the evaluation process with the Editorial Board. If you have a proposal for the *Lecture Notes in Computer Science* series (or one of the subseries, *Lecture Notes in Artificial Intelligence* or *Lecture Notes in Bioinformatics*), kindly send Alfred Hofmann an email including a (preliminary) Call for Papers or the URL of the conference Website, if it contains the latter.

Once your proposal has been accepted for the Lecture Notes in Computer Science series or one of its subseries, please feel free to mention this in your Call for Papers. We recommend that you create a link to our LNCS Website: [www.springer.com/lncs](http://www.springer.com/lncs) and refer prospective authors to the "For Authors" section. Under "Information for LNCS Authors" they will find the necessary templates and macros to create their papers in the format required for the series.

To enable us to include a link to your conference site on our "Forthcoming Proceedings" Web page, kindly send the URL to [ursula.barth@springer.com](mailto:ursula.barth@springer.com).

We require all the files for the volume nine weeks before the start of the conference. Please take this into account when fixing your own deadlines for the receipt of the final files from the authors. We no longer require the printed manuscript.

We need the source files ( $\text{\LaTeX}$  files with all the associated style files, special fonts and eps or bib files, or Word or rtf files) and the final pdfs of all the papers. We enter into the source files to insert running heads, final page numbers and a reference line at the bottom of the first page of each paper, and also to smooth out any capitalization and formatting inconsistencies. If an author has squashed his or her paper by removing vertical spaces or changing font sizes, etc., then

the paper will be reformatted and the final pdf will cover more pages than the original. Equally, if the print space is too short, i.e. less than 18cm (normal length is 19.3cm) then the paper will be reformatted, if possible. In addition, if need be, type 3 fonts are replaced by type 1 fonts. Please note that page numbers often change slightly. We use the final pdfs from the authors for checking purposes only.

We also require from you the source files and the final pdfs of the preface, table of contents and author index. At present, we recommend that you use the `lncsde2.tex` template from the archive `lncsde2.zip` available on the Web page (For Authors, Information for LNCS Volume Editors) for creating these pages. We encourage the insertion of section headings in the table of contents, but we would rather not include part titles in the main manuscript. We also prefer one paper to follow another, without the insertion of blank pages, irrespective of whether the paper starts on an even-numbered or an odd-numbered page.

The table of contents and author index you send will only be used as a reference, so please do not worry about the format of these files. However, it is important that the authors are listed according to their correct surnames in the author index you provide.

Please note that the authors' papers are handled individually. We do not wish to receive one single L<sup>A</sup>T<sub>E</sub>X file and one single pdf file for the entire volume.

When compiling the files, please make sure that there is only one set of source files and pdf files per paper, and that the pdfs match the source files. Any older versions of papers should on no account be sent on to us. Also, kindly check that, if authors have several papers in the volume, they write their names consistently. In addition, it should be clear which of the authors' names are first names and which are surnames (and if they have more than one surname, under which surname the author wishes to be listed in the author index). This is particularly important for Chinese or Spanish names. The names appear as initial(s) plus surname(s) in the running heads (inserted by us) and as surname(s), first name(s) in the author index. Finally, please note that all figures will be printed in black and white, unless special arrangement has been made for colored figures (a price list can be obtained from the Editorial). If authors send colored figures, they should make sure that they are also legible in black and white. The colored figures appear as colored figures in the online version and at no extra charge.

Once you have collected all the files, kindly send an email to [lncs@springer.com](mailto:lncs@springer.com) requesting a volume number. The volume number is used to label the folders in the following way: all the files pertaining to the first paper are placed in a folder. The folder is then labeled XXXX0001, where XXXX is the volume number. If the second paper starts on page 15, for example, then the folder containing the files for the second paper is labeled XXXX0015, and so on. The authors' files themselves are not renamed. They should be left as they are. Once you have done this for all the papers and for the frontmatter (which should be placed in a folder labeled "frontmatter"), kindly compress the folders with zip, tar or tar.gz and send the whole lot to the ftp server. You will be given the password together with the volume number.

Please send an email to [lncs@springer.com](mailto:lncs@springer.com) as soon as you have sent the files to the ftp server. You will receive an email informing you of their safe arrival and also of your contact person for the publication.

Once the source files have been worked on, we shall send the final pdf files to the contact authors, asking them to check their papers. This will usually happen about two weeks after the arrival of the files. Please send a list containing all the contact authors' email addresses (one per paper) when you send the files. Please write the starting page number of the paper next to the email address, so that it is clear which email address belongs to which paper. We would be grateful, if you could inform the authors of this procedure, so that they can ensure that they, or someone able to act on their behalf, have access to their email. The email will come from an email address in India and will have an attachment (the pdf file), so authors should make sure that emails with attachments are not automatically filtered out. If you would prefer all the final pdfs to be sent to one of the Volume Editors, then please inform us when you send the files.

The purpose of this extra control loop is to ensure that no errors have crept in during the publication process. We will not accept any updates (minor or major) to the papers themselves at this stage, nor will we correct any mistakes made by the authors themselves, as this would slow down the publication procedure considerably.

We also ask you to provide the names, addresses and email addresses of the Volume Editors, in the order in which they are to appear on the cover. We would also appreciate it, if you could provide us with a rough estimate of the number of copies you will require for the conference, in addition to the free copies. This is just to enable us to set the print run. We won't need your precise order until roughly three to four weeks before the start of the conference.

The preface of the volume is copyedited here and then sent to the Contact Volume Editor for his or her approval. At a later stage (approximately three to four weeks after the arrival of the files), the Contact Volume Editor will receive a copy of the cover and inside title pages for his or her approval. The manuscript is sent to the printer's prior to this. Once the cover has been approved, then this too is sent to the printer's. The book usually leaves the printer's two weeks before the start of the conference, to make sure the delivery arrives on time. It is essential that one of the Editors, or someone able to act on the Editors' behalf, is available during the entire publication period.

You will be given the deadline for your final order when the cover is sent out for your approval. When sending your final order, kindly specify the delivery address, including street name, telephone number and contact person, and the address to which we should send the invoice, including your VAT number if applicable. For post-proceedings, if the books are to be sent to individual authors directly, kindly inform the Editorial Assistant in charge of your project. She will then provide you with an Excel spreadsheet for the authors' addresses.

A proforma invoice is sometimes sent with the delivery. However, this is not the actual final invoice. The correct invoice is sent out a few weeks after the

delivery of the books. In case you receive an invoice in German, please note that Kontonummer means account number and BLZ means bank code!

Please note that we do not accept the return of books not distributed at the conference. However, a second bulk order may be placed after the conference, if additional copies are required. The net unit price remains the same.

### 1.1 LNCS Online

The online version of the volume will be available in *LNCS Online* at roughly the same time as the printed version. Members of institutes subscribing to the Lecture Notes in Computer Science series have access to all the pdfs of all the online publications. Non-subscribers can only read as far as the abstracts. If they try to go beyond this point, they are automatically asked, whether they would like to order the pdf. The Volume Editors are informed when their publication goes online and are given a password. This password enables them to access LNCS Online for a period of two months.

### 1.2 Copyright Forms

It is the task of the Volume Editor(s) to collect the copyright forms from the authors (one author may sign on behalf of all the authors of a particular paper) and to send them on to the Computer Science Editorial by courier. The copyright form may be downloaded from the “For Authors” (Information for LNCS Authors) section of the LNCS Website. It is acceptable if the authors have faxed their copyright forms to you, but please don’t fax them through to us. Also, please don’t scan them in and send them with the files. We need to receive the forms by courier.

## 2 The Preface and Frontmatter Pages

The preface starts on page V and is followed by the organization pages and then the table of contents. The organization pages may include the names of the committee members, the names of the referees, and, if appropriate, a list of the sponsors involved.

As the proceedings volumes are mainly read after the conference, we request that the preface be written in the past tense. We prefer the use of American English and ask that the conference acronym be written as follows: XYZ 2006, XYZ 2007, etc. For some examples of prefaces, kindly take a look at the frontmatter pages of the volumes already published in LNCS Online. The easiest way to access LNCS Online is to go to the main LNCS page, [www.springer.com/lncs](http://www.springer.com/lncs), and then to click on “LNCS Online” and then on “Access Through SpringerLink”.

### 3 Checklist

Here is a checklist of everything we require from you:

- ☐ The authors' source files and pdf files, labeled and packed as described in these instructions.
- ☐ The source files and pdfs of the preface, the table of contents, including topical section headings, and the author index. There is no need to worry about the format of the table of contents and the author index.
- ☐ The copyright forms (one per paper, signed by one author on behalf of all the authors of that paper).
- ☐ A list of the email addresses of the corresponding authors (one per paper). The list should include the starting page numbers of the papers, so that it is clear which email address belongs to which paper.
- ☐ The names, addresses and email addresses of the Volume Editors, in the order in which they are to appear on the cover, with special mention of the Contact Volume Editor and someone able to act on the Contact Editor's behalf in his/her absence.
- ☐ An estimate of the number of copies required, including the free copies.
- ☐ Your suggestion for the title.
- ☐ Please make sure that the names in the author index you send are listed correctly (family name(s), given name(s)) and according to the wishes of the authors.
- ☐ Anything else you would particularly like to draw our attention to.

### 4 BibTeX Entries

The correct BibTeX entries for the Lecture Notes in Computer Science volumes can be found at the following Website shortly after the publication of the book:  
<http://www.informatik.uni-trier.de/~ley/db/journals/lncs.html>

### 5 Lecture Notes in Computer Science in the ISI SCI Expanded

The Lecture Notes in Computer Science volumes are sent to ISI for inclusion in their Science Citation Index Expanded.

## **6 Author Discount**

LNCS authors are entitled to a 33.3% discount off all Springer publications. Before placing an order, they should send an email to [SDC-bookorder@springer.com](mailto:SDC-bookorder@springer.com), giving full details of their Springer publication, to obtain a so-called token. This token is a number, which must be entered when placing an order via the Internet, in order to obtain the discount.

## **7 Queries or Problems**

If you have any queries relating to the compilation of the files or the general publication procedure, then please send an email to [lncs@springer.com](mailto:lncs@springer.com).
