Dear Ms. Crawford,

We are pleased to submit the article "Lessons Learned from VCommerce: A virtual environment for interdisciplinary learning about software entrepreneurship" to Communications of the ACM.

We believe that this article is important to the field because it presents results from practical use at two different universities of a novel simulation framework that can help create more productive teams of managers and software developers. We also believe that CACM is an ideal publication venue for this research due to its broad mix of both academic and professional technologists.

As requested, two experts who would be qualified to review this article include:

Alan Carsrud, PhD,
Senior Lecturer and Academic Coordinator,
Price Center for Entrepreneurial Studies,
Anderson School, UCLA, Los Angeles
310/825-1808
alan.carsrud@anderson.ucla.edu

Tridas Mukhopadhyay
Professor of Industrial Administration, Director, Institute for eCommerce
Graduate School of Industrial Administration
385B Posner Hall
Carnegie Mellon University
5000 Forbes Avenue
Pittsburgh, PA 15213
Phone: (412) 268-2307
Email address: tridas@andrew.cmu.edu

Note: We are aware that the number of figures in our manuscript (5) is slightly in excess of the editorial guidelines for figures (3), although less than the total aggregate number of tables and figures (6). We welcome the opportunity to work with your editorial staff to overcome these and any other minor problems required to conform to CACM publication standards.

Sincerely,
Philip Johnson
Associate Professor
Information and Computer Sciences
